Policy, strategy and decision evaluation is a social process

Policy, strategy and decision evaluation is a social process. “Strategy evaluation’ is the process through which the strategists know the extent to which a strategy is able to achieve its objectives. In the words of professor william f. Jauch, “Evaluation of strategy is that phase of strategic management process in which the top managers determine whether their strategic choices are as implemented are being implemented.”

Evaluation Strategy Evaluation

Evaluation is the process through which the strategists know the extent to which a strategy is able to achieve its objectives. The purpose of an evaluation is to determine the effectiveness of a strategy in achieving the organizational mission, goals, and objectives. Evaluation involves the systematic collection and analysis of data and information about the effectiveness of a strategy in achieving its intended outcomes.

Evaluation criteria

Evaluation criteria are used to assess the relative merits and demerits of different strategies. The criteria used in evaluating a strategy should be relevant, comprehensive, and objective. Relevant criteria should be relevant to the objectives of the strategy being evaluated. Comprehensive criteria should cover all aspects of the strategy. Objective criteria should be based on objective evidence and not on subjective judgment.

Evaluation methods

Evaluation methods are used to collect data and information about the effectiveness of a strategy. Common evaluation methods include surveys, interviews, focus groups, case studies, and observations. Evaluation methods should be carefully chosen to ensure that the data collected is relevant, comprehensive, and objective.

Evaluation results

Evaluation results are used to make decisions about the effectiveness of a strategy. The results of an evaluation should be used to determine whether a strategy is achieving its intended outcomes, whether the strategy is effective, and what changes should be made. Evaluation results should be used to inform policy decisions and improve the effectiveness of strategies.

Evaluation implementation

Evaluation implementation involves the implementation of an evaluation strategy. Evaluation implementation involves the development of an evaluation strategy, the collection and analysis of data, and the dissemination of results. Evaluation implementation should be carefully planned and executed to ensure that the results of an evaluation are used to improve the effectiveness of strategies.
