**Paraphilia - Wikipedia**
Paraphilia (previously known as sexual perversion and sexual deviation) is the experience of intense sexual arousal to atypical objects, situations, fantasies, behaviors, or individuals. There is no scientific consensus for any precise border between unusual paraphilic ones. There is debate over which, if any, of the paraphilias should be listed in diagnostic ...

**Sexology - Wikipedia**
Sexology is the scientific study of human sexuality, including human sexual interests, behaviors, and functions. The term sexology does not generally refer to the non-scientific study of sexuality, such as social criticism. Sexologists apply tools from several academic fields, such as biology, medicine, psychology, epidemiology, sociology, and criminology.

Evolution (explained with diagram and)
1. It is not able to explain the phenomena of mimicry and protective colouration. 2. Rate of mutation is very low, i.e. one per million or one per several million genes. 3. Oenothera lamarckiana is a hybrid plant and contains anamolous type of chromosome behaviour. 4. Chromosomal numerical changes as reported by de Vries are unstable. 5.

Derrida, Jacques | Internet Encyclopedia of Philosophy
For instance, in Speech and Phenomena, Derrida argues that if a ‘now’ moment is conceived of as exhausting itself in that experience, it could not actually be experienced, for there would be nothing to juxtapose itself against in order to illuminate that very ‘now’. Instead, Derrida wants to reveal that every so-called ‘present’, or
